

```

private Node parseExprList() {
    /*
     * Node head = parseExpr(); if(head == null) return null; Node
lastNext
     * = parseExpr();
while(lastNext!=null){ head.setLastNext(lastNext);
     * lastNext = parseExpr(); } return head;
    */
    Node head = parseExpr();
    // head의 next 노드를 set하시오.
    if (head == null) // if next token is RPAREN
        return null;
    head.setNext(parseExprList());
    return head;
}

```
